

SOUND SYSTEM 2.1

| ★★★★★

▶ DLS FLATBOX / Q-SUB 10 • 1.225 €

Original as well as efficient

Highly flexible sound-station set, ideal for complementing flat-screen TVs and Home Cinema systems, as well as Hi-Fi systems

To Car-Audio lovers there's not much more I can say about this Swedish brand that you don't already know. But to those who follow home sound technology, I can say that we are talking about one of the most prestigious brands internationally in the manufacture of Drivers or speakers. And it is precisely one of the latest technological features of this brand -and I apologize for speaking so directly but I am forced to due to lack of space- that I have just tested: the "Flat-box" system in combination with the "Q-sub 10" Subwofer, a set that you can use for your specific needs whether you are a Home Cinema aficionado or a traditional Hi-Fi sound lover.

Ideal for use with flat-screen TVs

It is clear that such baffles are atypical, especially if we look at them exclusively from a traditional point of view. In reality they have been designed such that any aficionado can take advantage of their small

depth (only 92 mm) and be able to mount them on a wall in a horizontal, vertical, or angled position. Each of them includes three transducers: two mid-range transducers with 3" cellulose fiber cones and one excellent 1.1" silk tweeter in D'Appolito configuration, where the lower frequencies are enhanced by two reflex ports. As to the Subwoofer, Q-Sub 10 has a powerful 10" front woofer, amplified by means of a high-quality analog device. It includes both low-level and high-level signal inputs (Speakers), a low-pass filter adjustable from 50 to 120 Hz or a variable phase control from 0 to 180°. ■

FEATURES

SYSTEM COMPONENTS:

(2) Flatbox Baffles + Sub

SPEAKERS:

Flatbox: (2) 3" Midrange, 1.1" Silk Tweeter
Sub: 10" Pulp Woofer

FREQUENCY RESPONSE:

70 Hz - 25 kHz (Flatbox) 30 Hz - 120 Hz (Subwoofer)

PERMISSIBLE POWER:

30 to 120 W (Flatbox c.u.) 100 W (Autoamplified Sub)

DIMENSIONS:

220 x 92 x 520 mm (Flatbox) 330 x 310 x 370 mm (Sub)

WEIGHT:

4.6 / 15 Kg (Flatbox / Sub)

DISTRIBUTOR:

www.ecsamovil.com Tel.: 961 609 835

NOTABLE FEATURES:

- Its adaptability to Home Cinema installations like Hi-Fi
- Agile sound, with good pitch and "body"
- Easy mounting and adjustment, delivered with black and white grilles

TO IMPROVE:

- Connection terminals of the satellite speakers

ANALYSIS

REMARKABLE The technology featured in this sound system reveals the deep knowledge of this Swedish manufacturer with respect to the behavior of the components as well as musical sound performance. So those who decide to listen to it will observe a set that is fast and dynamic in the reproduction of transients, reliable with nuances and highly powerful.
